## DETAILED ACTION

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- 2. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Yeh et al., U.S. Patent 6,673,404 (hereinafter "Yeh"). Yeh teaches a natural rubber latex used to form the base glove may be compounded with stabilizers, a cross-linker, a vulcanizer activator, a vulcanizer accelerator, an antioxidant, an antiozonant. Yeh further teaches the vulcanization accelerator may include mercaptobenzothiazoles. Thus, Yeh anticipates the present invention, a latex film compound comprising the reaction product of antioxidant, mercaptoarylazole compound, polymer and curing system.
- 3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Meier et al., U.S. Patent No. 6,797,755.
